

Visitor Module

Visitor Module is a web-based management system that implements entry registration, exit registration, snapshot capturing, visitor quantity statistics, reservation management and shares information among registration sites. It is highly integrated with the access control system and elevator control system. It is generally used at reception desks and gates of enterprises to manage visitors.

Multi-point Visitor Registration Management based on Web

Supports setting of visitor registration points, multi-point registration visitor management, and mutual sharing of a publicized management database.

E-mail and SMS Notification Functions

During visitor registration, in case of overtime visits, visitor registration, overtime visitor registration, visitor checking out, monitoring lists, the system will deliver e-mail or SMS notification to visitors, recipients or managers in registration site. SMS and e-mail templates support customization, templates with different contents, delivery rules and recipients according to conditions can be customized. If it is set to deliver in day of visit, all notifications will be delivered to the specific recipients on specific time.

If there is an overtime visit, the system will deliver e-mail or SMS notification to visitors, recipients or managers in registration sites.

Visitor Management Process

Employees can help the visitors to make reserved registration, successful reservation information will be delivered via email or SMS to notify recipients, visitors and registration managers etc. Visitor registration can also be done by identity card registration (OCR or ID Reader), signature, photo capturing, passport capturing or car information registration etc. in order to enhance the safety level. Visitor authority supports automatic distribution of recipient department authority group according to visitor's location. Also, copying function enables users to select needed visitor information and copy to new registration interfaces, including recipient information, reasons for visit, corporate information, authority information etc., which can bring convenience and save time to group visit registration. After successful registration, visitors may have access to designated areas with visitor cards or visitor receipts. It supports multiple verification modes including card, password, finger print, QR code etc. After visit, visitors may return cards in the registration site for checking out.

Visitor Module Supports Visible Light Facial Recognition

Client can use the photo capture function in the visitor registration page to register visible light facial templates, and share with all Visible Light Facial Recognition Terminals.

QR Code Safe Entry Solution for Staff and Visitors

Mobile QR Code Check-in enables both staffs and visitors to complete touchless check-in process, by utilizing their own mobile devices to scan QR codes for access of secured areas.

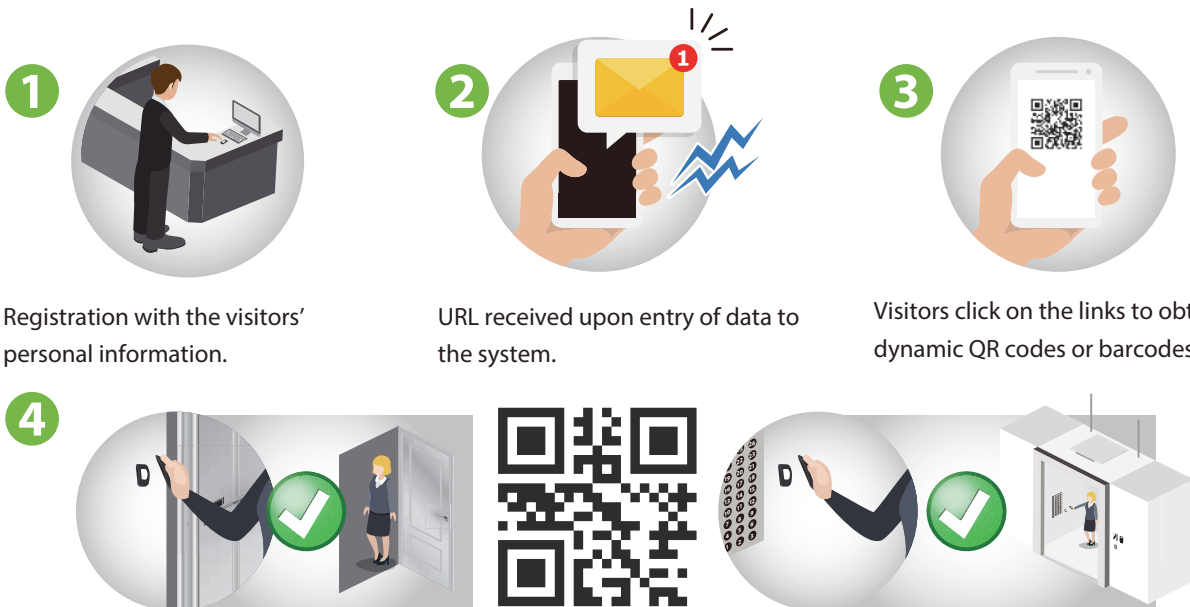

Scramble QR Code for Better Security

In order to prevent unregistered people from gaining access by copying QR codes or barcodes without permission, the images of QR codes and barcodes in the URL can be set to dynamic (scramble), which means that the QR code images will be automatically changed in every 30-300s (adjustable). Administrators no longer need to generate new set of QR codes to update visitors' entry content anymore.

How it works

Up completion of visitor registration, each member or visitor will get a hyperlink from the service provider, which directs to a dynamic QR code or barcode to different gates and doors. With the QR codes, visitors are allowed to enter the specifically authorized areas.

Within 30 seconds, registered visitors will be granted access with the same QR Code. Apart from building entrance, entrance control, car-park gates and elevators also support QR code access function.

Maximum Visitor Check

In order to provide a secure visitor management system for a number of visitors visiting the office building, ZKBioSecurity has a function of maximum number of visitor check. Once the number of visitors on the day reaches the default upper limit, prompt pop up will be delivered when Admin enters the registration page.

Maximum visitor check

Open single-day maximum visitor visits monitoring
 Maximum number of visits
