#### Read Before Use

## Safety Caution

- 1. Do not use in environments with corrosive substances such as intense radiation, high magnetic field, high temperature, high salinity, etc.
- 2. Please set electronic key immediately in case the door is opened illegally.
- 3. For your safety, please check the key box is opened or not.
- 4. To power on the lock, four alkaline AA batteries (not included) are required. Non-alkaline and rechargeable batteries ARE NOT RECOMMENDED.
- 5. Do not remove batteries when the lock is in working state.

#### **Lock Parts**

#### **Basic Function**

#### Random Password

Users may enter any number of random digits before or after the correct password as long as the maximum number of digits entered is 30 or less.

For example: If the correct password is 123456, the random password can be 89<u>123456</u>807, <u>123456</u>2363, 389<u>123456</u>, etc.

#### Initialization

Initializing the lock means all data will be deleted and restored to factory default setting. Operation steps: Press the reset button on the back body of the lock or enter the menu to operate, the lock prompts the voice of "succeed", and then the initialization is finished completely.

# Normal Open Mode

Normal open mode is to keep lock always unlocked. Rotate thum-turn knob to enable or

disable the mode. Or press 2 and 8 after unlocking the door with administrator verification. Press \* to cancel.

# **Low Battery Warning**

If the battery is low, the lock will prompt a low battery sound.

Note: Access to operation is not allowed in low battery status.

#### **Others**

Without any operation, the lock will power off automatically within 10 seconds.

# Capacity

Group	Verification Mode	Capacity
Administrator	Password	1
	Fingerprint	300
